

Attorney Docket No.: 016252-002110US (AF-0019)
Inventors: Graham et al.
Serial No.: 10/032,658
Filing Date: November 8, 2001
Page 3

In the specification:

Please replace the paragraph at page 5, lines 17 through 22 with the following:

Figure 6A-C is an alignment chart of recombinant isoforms of THP. The positions in which the nucleotide is conserved in all cDNA sequences are marked by an asterisk (*). The complete amino acid sequence is indicated only for YL-1. Residues of other isoforms which are identical to those found in YL-1 are indicated by a period (.). Differences are shown where found. Gaps in both the cDNA and the protein sequences are indicated by dashes (-----).
